## **DISCUSSION:**

### Petroleum Products and Weighmaster Inspection

The Petroleum Products portion of this agreement stipulates that the County will be reimbursed at the rate of \$75 per initial inspection of establishments selling or distributing petroleum products, for a maximum of \$9,675 for Fiscal Year 2008-2009. This represents 129 initial inspections for this fiscal year. An initial inspection is the first inspection in the fiscal year of a location where the primary business is the sale of petroleum products (i.e., retail service stations, distributors of engine fuels, oils and quick-lube shops). These inspections, conducted by Stanislaus County Weights and Measures Inspectors, include verification of compliance with the Business and Professions Code and California Code of Regulations relating to the advertising and labeling of automotive and petroleum products at the location. The agreement also stipulates that Stanislaus County will provide a list of the name and physical address of each location in the County having retail engine fuel dispensers in commercial use to the California Department of Food and Agriculture, Division of Measurement Standards.

Under this contract, the Weighmaster Inspection Program provides that the County will be reimbursed at the rate of \$75 for each initial audit inspection of an establishment licensed as a weighmaster. The Fiscal Year 2008-2009 allocation for this activity is \$3,225, representing 43 initial audit inspections, or approximately 20% of the licensed locations in the County. An initial audit inspection is the first audit inspection in the fiscal year of a business location that is operating as a licensed weighmaster.

Additionally, Stanislaus County Weights and Measures Inspectors also conduct tare verification inspections. These inspections include verification of pre-determined individual tare weights (\$37.50 each), seasonal tare weights or cab cards (\$37.50 each), follow-up audit inspection of locations with previous substantial violations (\$75.00 each), and verification of unlicensed weighmaster locations that license as a result of a documented County informational visit (\$37.50 each). The total allocation for Fiscal Year 2008-2009 to the County for these inspections is \$3,225.

The total contract amount for the Fiscal Year 2008-2009 Petroleum Products/Weighmaster Inspection Program is \$16,125.

### Red Imported Fire Ant Program

The Red Imported Fire Ant (RIFA) is a serious pest in the western United States, which inflicts a painful bite resulting in infection. In addition to this health threat to farm workers, the RIFA builds hard mounds of soil, damaging expensive farming equipment.

While there have been several positive finds for RIFA in Stanislaus County over the past few years, these sites are currently under eradication treatment and therefore Stanislaus County is not considered "infested". It is crucial to continue to survey the

County for this damaging insect pest.

This contract with the California Department of Food and Agriculture provides reimbursement for survey work to be completed in Fiscal Year 2008-2009. The survey includes placing bait stations throughout the survey area on uniform grid intervals according to the State protocol. Positive finds will be recorded on cards as well as using Geographical Position System (GPS). Primary areas to be surveyed will include bee drop locations and retail and wholesale nurseries. Secondary sites include newly landscaped areas, over-wintering sites for out-of-state bees, trucking facilities, roadside rest areas, hay yards and fairgrounds. The contract amount is \$20,707.

**POLICY ISSUE:**

The Board of Supervisors is asked to determine if these contracts are consistent with the Board Priorities of striving for a Strong Agricultural Economy/Heritage and a Strong Local Economy.

**STAFFING IMPACT:**

**California Department of Food and Agriculture  
San Joaquin Valley Work Plan  
2008/09 Red Imported Fire Ant (RIFA) Survey**

**Survey Protocol:** All survey is to be done using Spam®, cut into small cubes, as the bait. Plastic medfly baskets and survey flags are to be used to contain the bait and mark the location. Place the bait stations throughout the survey area on uniform grid intervals of 50-feet. Bias the placement of bait stations, where possible, to include the edges of objects (buildings, fences, pots, lawns, sidewalks, etc.). Avoid overly wet areas (standing water) and dry areas lacking any moisture. During hot weather (temperatures exceeding 85°F) place the bait stations in the afternoon and retrieve them the next morning before the temperature becomes too hot. For cooler days (below 85°F) place the bait stations in the morning and retrieve them in the afternoon. Collect **all** *Solenopsis* species and submit them for identification to a supervisor or entomologist experienced in the identification of RIFA.

Collection of ant samples will require the following equipment: a small model paintbrush, a plastic funnel (one used for white gas stoves, usually available at Wal-Mart, etc.) alcohol vials, a small pair of scissors, paper, pencil, Sharpie™ marker, survey record cards, PDR forms, plastic Ziplock™ bags (freezer size and sandwich size) and a tote box. After the designated period of time, check each bait station previously placed. If no ants are present, dispose of the bait and collect the flag and basket for reuse. If an ant sample is taken, place a unique number on a piece of flagging tape with a Sharpie™ marker and mark the location. Draw a map of the site and locate all samples on the map (This will probably be the most practical method in high traffic areas. Be sure the map can be used to return to an exact spot if a sample is determined positive for RIFA). Include the same sample number in the alcohol vial written in pencil. Ants on the bait can be tapped into the funnel and directly into the alcohol vial. Collect at least six to eight ants from a bait station. If the funnels are not available, use the small paintbrush dipped into the alcohol. Try to collect the larger specimens. Keep the sample clean. Collect ants from a surface that will not put dirt into the alcohol vial, such as one of the plastic survey flags or a piece of paper. The plastic white gas funnels provide the easiest method of collection. Dirty samples can make identification difficult. Place the vials into a freezer size Ziplock™ bag. Numerous vials can be placed into a single bag. In a sandwich size Ziplock™ bag place the PDR and supplement (if needed) and put the sandwich size bag into the freezer bag with the specimens. Each bag should be identified as to the exact location from which the samples were collected. Flags and baskets can be reused until they are no longer in good physical condition.

Samples collected should be submitted to the county entomologist or biologist for screening. Suspect samples are to be submitted to the Plant Pest Diagnostic Center for positive determination. Positive finds should be recorded on the survey record card. Survey flagging tape should be left at every positive RIFA site until eradication is completed. Positive RIFA sites can also be recorded using GPS. This would be advisable in high traffic areas such as: nurseries, urban plantings, roadside rest stops, etc.

Complete all primary sites before progressing to secondary sites. Keep records of all locations surveyed and number of samples collected by locality.

**Areas to be surveyed include:**

**Primary sites - In order of priority**

1. Bee drop sites (If infested bees are discovered at a site notify the CDFA field office. This site will need to be surveyed throughout the season.)
2. Retail and wholesale nurseries and landscaper's holding yards
3. Common landscaped areas of new urban or commercial developments (last 10 years)

**Secondary sites -**

1. Over-wintering sites for out-of-state bees
2. Trucking facilities
3. Roadside rest areas and truck stops
4. Hay yards and large dairies
5. Fairgrounds – stock areas
6. Cal Trans holding facilities
7. Others – please contact Program Manager if another option for survey is discovered

If all of the above areas have been surveyed in the past two years, then concentrate RIFA survey on the following items, **with the exception of the bee drop sites**. (Bee drop sites should be monitored every year.):

1. Urban grid survey – Survey all urban areas on a ½ mile grid pattern. Place four bait stations on four separate properties at each grid point. Follow the instructions above for bait placement. For larger cities do every other grid point then proceed to smaller communities. Finish the smaller communities and if funds are still available finish the remainder of the larger cities.
2. If the capability exists, research old databases for locations that were almond orchards in past years and are now planted in other crops or houses. These can either be surveyed or relayed to CDFA to be included in the almond orchard survey.

c. Government Code Section 4553.

d. Upon demand in writing by the assignor, the assignee shall, within one year from such demand, reassign the cause of action assigned under this part if the assignor has been or may have been injured by the violation of law for which the cause of action arose and (a) the assignee has not been injured thereby, or (b) the assignee declines to file a court action for the cause of action. ## SCOPE OF WORK

### Initial Inspections:

In the best interest of the State, in accordance with California Business and Professions Code Section 13434, and under the authority of the Secretary of the California Department of Food and Agriculture (CDFA); the Division of Measurement Standards (Division) and the County of Stanislaus agree to the following:

An initial inspection is the first inspection in the fiscal year of a location where the *primary* business is the sale of petroleum products (i.e., retail service stations, distributors of engine fuels, oils, quick-lube shops, etc.).

An initial inspection shall include the verification of compliance with the appropriate provisions of the Business and Professions Code and California Code of Regulations relating to the advertising and labeling of petroleum and automotive products, and to verify compliance with the provisions of Section 13660 at the location. Inspection reports shall be made for each establishment inspected on forms supplied by or approved by the Division containing legible heading and violation information. Two copies of the inspection reports shall be sent to the regional field office. The original inspection reports shall be maintained at said county Office of Weights and Measures for three years and be made available to the CDFA, Division of Measurement Standards, upon request.

The Department will pay said County \$75.00 for each initial inspection of establishments selling or distributing petroleum and/or automotive products; provided the inspection is done to determine compliance with California Business and Professions Code, Division 5, Chapters 14, 14.5 and 15. The total allocation to said County for these inspections shall not exceed \$9,675.00 for this agreement. This represents 129 initial inspections per fiscal year.

### Inspection Requirements

The Division reserves the rights to, at its discretion, assign and direct the county to take designated samples of bulk automotive or petroleum products for the purpose of marketplace surveys. The locations visited for the purpose of obtaining these designated samples shall be counted as inspections authorized by this agreement and will be paid at \$75.00 per location. The assigned number of inspections at brake shops, quick-lube shops, and other retail establishments selling bulk petroleum products or automotive products shall not exceed 10% of the total annual initial inspections authorized. Prior to being assigned sampling duties, the Division will provide training in the proper sampling and sample tag/chain of evidence completion procedures. Unless directed otherwise, all samples are to be submitted to the Division's Sacramento laboratory.

Sample containers and subvention sample identification tags will be provided by the Division. Payment for samples and transportation of the sample to the Division's Sacramento laboratory shall be the responsibility of said County. The color coded subvention sample identification tags must be used on subvention samples to identify them for reimbursement verification. Said County will use the inspection and sampling procedures outlined in the Division of Measurement Standards' "Petroleum Products Inspection and Sampling Procedure Manual." Off sale of samples not meeting

product specifications shall be the responsibility of the County or the Division, if requested to do so by the County, and will be handled in accordance with the guidelines established in the Division's "Citation Procedure Manual."

Nothing in this agreement prevents or precludes Division staff from performing routine location inspections within the county. The Division also reserves the right to do random re-inspections of locations that were billed for by the County. These re-inspections will be performed by Division staff for the purpose of evaluating the work of the county. Enforcement action, if needed, will be taken by Division staff following the "Citation Procedure Manual" guidelines. The county will be notified when Division staff is performing location inspections within the county.

Said County agrees that appropriate enforcement action shall be taken upon discovery of violation(s) at the location being inspected. The enforcement actions will be handled in accordance with the guidelines established in the Division's "Citation Procedure Manual." When an enforcement action other than the issuance of a Notice of Violation (NOV) is specified and said county is unable or fails to take that action, the Division shall take the specified enforcement action. Payment for the inspection will be withheld if enforcement action is not taken against the violator.

**All requests for payment** shall be made using the Petroleum Subvention Contract Invoice, supplied, and shall include the official county letterhead.

Funds will be disbursed to the County on approval of the invoice submitted quarterly. Included with the invoice shall be a list stating the total number of initial inspections conducted, the name and address of the location inspected, the number of designated samples taken, the name and location where the samples were taken, and the amount of money requested.

The invoice for billing shall be submitted to the Division of Measurement Standards Office in Sacramento.

**Completed legible copies of both the pink and goldenrod report forms are to be forwarded to the regional office within (five) working days after completion of the inspection.**
