DISCUSSION:

Pest Detection

(California Department of Food & Agriculture)

The goal of the Stanislaus County Pest Detection program is to detect insect pests before they can cause infestation or damage to residential and agricultural areas. This program protects California agriculture, the local economy and homeowners' fruit-bearing trees and plants.

In addition to Agricultural Inspectors, employees of Stanislaus County Agricultural Commissioner's Office who primarily work in this program are Agricultural Assistants; also known as "insect trappers" or "trappers". These trappers work in both rural and urban areas of Stanislaus County placing insect traps in trees and plants. Trappers inspect the traps on a regular basis to check to see if any of the insect pests they are looking for have been found. The early detection of insects can help to ensure that an infestation is prevented. Some of the insects which trappers try to detect are: Caribbean Fruit Fly, Mexican Fruit Fly, Olive Fruit Fly, Oriental Fruit Fly, Mediterranean Fruit Fly, Melon Fruit Fly, Guava Fruit Fly, Gypsy Moth, and Japanese Beetle. If an insect of concern is found, the California Department of Food and Agriculture assists the County program by providing additional personnel to help put a more intensive trapping program in place for a specified duration of time. If necessary, the State will also assist in the eradication of an insect when indicated.

The Pest Detection contract with the California Department of Food and Agriculture reimburses the County for personnel, equipment and vehicle expenditures to conduct the program. This program is vital to the protection of local and State agriculture, by preventing the introduction of unwanted and injurious pests. The total contract amount is \$330,162; allocating \$165,081 for each Fiscal Year, 2008-2009 and 2009-2010.

POLICY ISSUE:

The Board of Supervisors is asked to determine if this contract is consistent with the Board Priority for a Strong Agricultural Economy/Heritage.

STAFFING IMPACT:

There are no staffing impacts associated with this item.

SCOPE OF WORK (#1)

**CONTRACT SPECIFICATIONS FOR STATE-COUNTY
INSECT PEST DETECTION TRAPPING**

AGENCY RESPONSIBILITY

Section 1

The California Department of Food and Agriculture shall:

- A. Provide all traps, trap parts, and lures.
- B. Provide technical assistance and training to county agricultural commissioner personnel on the use of traps and detection procedures.
- C. Assist with and review the county's trapping programs annually for the purpose of establishing and approving the FY-Commitment Form (Form 60-221), which is attached hereto and made part of this agreement.
- D. Provide county trappers with copies of the CDFA Insect Trapping Guide.
- E. Provide an annual training program specifically for trapping supervisors in which all counties shall participate.
- F. Provide for the disposal of Dibrom treated wicks according to CA-EPA guidelines.

Section 2

The County Agricultural Commissioner shall:

- A. Submit a completed Trapping Hours/Year Worksheet (Form 60-223, 8/26/08) along with the budget display (work plan) for each fiscal year trapping program. Form 60-223 will be prepared by using the Servicing per Year sheet (Form 66-223A, 8/27/08).
- B. Ensure that all trapping activities conform to the most recent version of CDFA Insect Trapping Guide (ITG). Place and service the specified number of each trap type specified on the FY - Commitment Form.
- C. Ensure that a copy of the ITG shall be kept in each trapper's vehicle for reference.
- D. Ensure that all deployed traps are properly identified with a unique trap number and accurately reflect servicing, baiting and re-baiting dates. The unique trap numbering system will be based upon the six digit California state plane coordinate system as such, six digit state plane grid number, hyphen, quint (aka subgrid) designation, hyphen, two letter trap type and trap number. For example: 032046-N-MF2.

- E. Ensure, for counties that do not have year round programs, that traps are deployed **prior** to the start of the specified trapping season, so that the first servicing of the traps occurs at the start of the trapping season. The traps will be removed at the first servicing after the **conclusion** of the trapping season.
- F. Ensure that Jackson Medfly (Mediterranean) traps, baited with Trimedlure, are serviced every fourteen days from July 1 through October 31, and May 1 through June 30 for fiscal years 2008-09 and 2009-10.
- G. Ensure that McPhail traps are serviced every seven days from July 1 through October 31, and May 1 through June 30 for fiscal years 2008-09 and 2009-10. As stated in the ITG, McPhail traps should be placed in garden sites with **melon** traps June through October. At all other times (one month), the McPhail traps should be placed on properties separate from all other fruit fly traps.
- H. Ensure that all ChamP™ traps, baited with ammonium bicarbonate, in **rural** areas will be serviced once each month and relocated at that time from July 1 through October 31, and May 1 through June 30 for fiscal years 2008-09 and 2009-10.
- I. Ensure that Jackson Oriental fruit fly traps, baited with methyl eugenol, are serviced every fourteen days from July 1 through October 31, and May 1 through June 30 for fiscal years 2008-09 and 2009-10.
- J. Ensure that all Jackson melon fly traps, baited with cuelure, are serviced every fourteen days from July 1 through October 31, and June 1 through June 30 for fiscal years 2008-09 and 2009-10.
- K. Ensure that gypsy moth and Japanese beetle traps are serviced every 14 days from July 1 through August 30, and June 1 through June 30 for fiscal years 2008-09 and 2009-10, unless determined otherwise by the CDFA District Entomologist and noted on the FY-Commitment Form (60-221).
- L. Send trapping personnel to training provided by state detection entomologists.
- M. Maintain a Daily Trapping Summary (Form 60-210) for each trapper. This form must be available for review by the district entomologist or the CDFA audits office for three years. To facilitate program audits, the Daily Trapping Summary – whether completed, daily, weekly or monthly – must be signed by the individual who performed the work indicated on that summary. This applies to hand completed or electronic copies.
- N. Complete a monthly Pest Detection Report Number 1 (Form 66-035), documenting all traps deployed, added, removed and serviced during the month. A servicing is an inspection of the trap for the presence of the target pest. Relocations are considered trap servicings. Do not count trap relocations as “removed” and then “added.”

- O. Submit invoices within 30 days after the end of each reporting period. Send the monthly invoices, along with the corresponding Report Number 1. Continue to send monthly invoices even if the fiscal year contract funds are depleted.
- P. Submit the monthly invoice and Report Number 1 to:

PD/EP
1220 N Street, Room A-330
Sacramento, CA 95814
Attn: Joanne Shimada
- Q. Provide one set of trapping records for all traps. This set, in the form of a "Trap Book," shall indicate the exact trap location using a site map and all information regarding trap placement, servicing, baiting, relocation and removal.
- R. Maintain an inventory of known fruit fly host sites. The inventory shall be: organized by square mile, contain the address of host property traceable to the nearest cross street, and indicate all known hosts on that property. The inventory shall be updated yearly. The multiple trap card system will suffice for this inventory.
- S. Maintain county wall maps with numbered square-miles grids – according to the California State Plane Coordinate System - depicting the density of all traps deployed.
- T. Allow state detection personnel and/or federal PPQ officers to perform quality control inspections on all county trap lines, including any specified county commitment trap lines.
- U. Allow state detection entomologists and/or federal PPQ officers to accompany trappers and/or supervisors in the field. This will be credited as field training for county personnel.
- V. Counties generating Dibrom treated wicks (i.e., Oriental, melon, peach and guava fruit fly detection traps) shall possess a CAI number issued by the California Environmental Protection Agency.
