SUBJECT:

Approval to Set a Public Hearing on April 27, 2010 at 9:10 a.m., to Introduce and Waive the First Reading of an Ordinance to Amend Existing Fees for the Department of Public Works Engineering Division

STAFF RECOMMENDATIONS:

Set a Public Hearing on April 27, 2010 at 9:10 a.m to introduce and waive the first reading of an ordinance to amend existing fees for the Department of Public Works Engineering Division.

FISCAL IMPACT:

The proposed fee increase will enable the Department of Public Works to recover more of the cost of providing construction inspection, plan review, and project review services. The proposed fees will generate approximately an additional \$36,000. This revenue will be used to offset the staffing and operational costs associated with these services. Staffing costs to provide these services for Fiscal Year 2009-2010 were approximately \$495,000. Revenues for the same time period, based on the existing fee schedule, are projected to be \$225,000, a deficit of \$270,000. The proposed increase will result in a deficit of \$234,000.

BOARD ACTION AS FOLLOWS:

Approval to Set a Public Hearing on April 27, 2010 at 9:10 a.m., to Introduce and Waive the First Reading of an Ordinance to Amend Existing Fees for the Department of Public Works Engineering Division

**DISCUSSION:**

The Public Works Department provides services as required by law to the public and the development community. Some of these services encompass construction inspection, plan review, and project review. Public Works charges fees to recoup the costs of providing these inspection and review services. The cost of providing these services has increased, but the fees have not been fully recovered.

Last year on May 19, 2009, the Board approved an adjustment to the fees to recoup the cost associated with providing Engineering Services such as construction inspection, plan review and project review. The proposed adjustments were staged to gradually increase the fees in five annual increments. Public Works' plan check, encroachment permit, excavation permit, street improvement construction permit, and construction inspection fees were increased effective July 1, 2009. Last year was the first year of implementing the fee adjustments based on a per hour baseline rate of \$60/hour. Staff is now recommending to implement the second year base line rate of \$70/hour.

Public Works realized that in the current economic environment, it would have been unreasonable to propose to increase fees in one year to cover the deficit between the current fees charged and the cost of delivering the services that has developed over the last 18 years since the previous fees were set in 1991. Therefore, Public Works proposed to increase the fees incrementally over a five-year period. The remaining adjustments will be returned to the Board for approval on an annual basis throughout the five-year cycle as shown in the following table:

Proposed Increases Over Five Years				
*Year 1 2009-2010	Year 2 2010 - 2011	Year 3 2011 - 2012	Year 4 2012-2013	Year 5 2013-2014
\$60	\$70	\$80	\$90	\$95

\*The first year increase was approved by the Board on May 19, 2009.

Public Works proposes to use \$70 per hour as a baseline for setting inspection services and permit fees. The proposed fees are based on the average amount of time it normally takes to perform the various inspections. Public Works is submitting for approval of Year 2 (2010 – 2011) of the five-year cycle.

Staff's current average weighted hourly rate is \$89. Based upon the current weighted rate and the proposed fee in year two, Public Works will continue to subsidize these services. With projected equity increases and cost of living increases, it is anticipated that the Department will be able to eliminate the deficit by year five.

Approval to Set a Public Hearing on April 27, 2010 at 9:10 a.m., to Introduce and Waive the First Reading of an Ordinance to Amend Existing Fees for the Department of Public Works Engineering Division

### **Fee Review Process**

In order to determine proposed fee increases in five yearly increments, Public Works used the following process:

- In reviewing the fee structure, Public Works staff believed that the fees had fallen behind what is customarily and routinely charged by other San Joaquin Valley governmental entities for the same types of services.
- Public Works' Engineering staff contacted Fresno County, Merced County, and San Joaquin County, and the cities of Ceres, Fresno, Merced, Modesto, and Oakdale to obtain information about the fees they charged for plan checks, encroachment permits, excavation permits, street improvement construction permits, and construction inspections.

A spreadsheet was developed listing the fees charged by those government entities along with the current Stanislaus County Public Works fees (Exhibit C).

- The fees charged by other government entities were averaged and compared with the Stanislaus County fees. In addition, the variation in methods for charging the fees was also evaluated. Variations included a flat rate, charging actual time taken to perform the services, and requiring deposits based on a percentage of the engineer's estimated cost to complete the project.
- Based on the above analysis and evaluation Public Works has arrived at a proposed change in construction review and inspection fees.

### **Proposed Fee Changes**

Excavation Permit (for any excavation occurring in a County right-of-way): The basic permit fee is proposed to remain at \$20. This fee includes \$5 each for Flood Plain Administrator review and Geographic Information System (GIS) updates as related to the improvements and \$10 for administrative fees. An additional fee for the inspection of the excavation work would change from a \$120 flat fee per 250 or 500 lineal feet of excavation of paved or unpaved area respectively to a \$140 flat fee. The fee is based on the average inspection time of two hours per project.

Encroachment Permit: The flat rate fee that has been charged for an encroachment permit (for construction that occurs in a County right-of-way) for driveway construction has been \$120. The proposed fee increase is to \$140. Inspection for a concrete driveway takes a minimum of 3 inspections totaling on average 2 hours. With an hourly charge of \$70, 2 hours of inspection time equals \$140.

Approval to Set a Public Hearing on April 27, 2010 at 9:10 a.m., to Introduce and Waive the First Reading of an Ordinance to Amend Existing Fees for the Department of Public Works Engineering Division

Construction Permits: Permits for street improvements have been charged at a flat rate fee of \$40 for the basic permit and an additional fee of \$60 per 250 lineal feet for inspection of curb and gutter work, sidewalks, and matching pavement construction, and a flat fee of \$60 for drywell inspections. Using a baseline of \$70 per hour and the average inspection time for the listed services of two hours, the proposed fee is \$140 per 250 lineal feet plus base permit fee of \$40. This fee includes \$5 each for Flood Plain Administrator review and Geographic Information System (GIS) updates as related to the improvements and \$30 for administrative fees. Fees are to be paid in advance of the inspection.

Re-inspections will be increased to \$70 per hour from the current \$60 per hour. A deposit of 10% of the engineer's estimate is required based on cost of the construction. Inspection time would be charged at the rate of \$70 per hour, the charge being drawn down against the deposit. At the completion of the project, the balance of the deposit would be remitted to the customer. If the deposit is not sufficient to cover all inspection charges, the customer will be billed separately for additional charges. The standard rate per hour for construction inspection is proposed at \$70 per hour.

Improvement plan checking is proposed to increase to \$90 per hour from the current \$80. However, an initial one-time fee of \$10 will also be charged to offset the staffing and operation costs associated with flood plain review and GIS updates as related to the improvements. As with large construction projects, a deposit of 10% of the engineer's estimate for the off site improvement cost of the project would be required, and review time would be charged back against the deposit.

The flat rate fee of \$85 for an annual transportation permit is proposed to be increased to \$90 per California Code of Regulations, Title 21 (Public Works), Division 2, Section 1411.3. Single Trip transportation permit (under the above code) is proposed to be increased from \$15 to \$16. These small increases to the transportation fees will not cover the cost of providing this service, however, the State Code limits these fees to the proposed amount.

The proposed new fee schedule is shown as Exhibit "A" in this document.

**POLICY ISSUES:**

Authority for the Department of Public Works to charge fees for use of County roads and inspection of constructions, excavations, and installations occurring in Stanislaus County streets is granted in California Street and Highways Code, Division 2, Chapter 2, Section 982, and Chapter 5.5, Article 2, Section 1464. The Board should consider if the recommended action is consistent with its priorities of a well-planned infrastructure system and the efficient delivery of public services.

Approval to Set a Public Hearing on April 27, 2010 at 9:10 a.m., to Introduce and Waive the First Reading of an Ordinance to Amend Existing Fees for the Department of Public Works Engineering Division

**STAFFING IMPACT:**

The proposed increases will enable Public Works staff to continue to provide construction inspection, plan review, and project review services in a timely manner.
