Approval to Adopt Plans and Specifications for the Hatch Road at Carpenter Road Intersection Project, Federal Project No. CML-5938 (182), and Set Bid Opening Date

DISCUSSION:

The purpose of the Hatch Road at Carpenter Road Intersection Project is to improve safety, capacity, and air quality at the intersection in an effort to maximize traffic flow throughout the County road network system, to accommodate existing traffic congestion conditions and to meet capacity requirements for future growth. The scope of the project includes, but is not limited to:

- Construction of traffic signals at the intersection of West Hatch Road at South Carpenter Road;
- Widening the individual legs of the intersection in all directions by installing dedicated left turn and right turn lanes to improve traffic flow through the intersection;
- Reconstruct existing intersection pavement with a brand new pavement section; and,
- Coordinating with utility companies with facilities within the Project limits, such as utility poles, irrigation facilities, and other private facilities, to be relocated, if necessary, to accommodate the signal and widening improvements.

On August 2, 2011, the Board awarded a design contract for All-Inclusive Engineering and Project Delivery Services to MCR Engineering. Preliminary engineering was performed by MCR Engineering.

The following tentative schedule is provided:
